Please submit this data sheet (and others) at the wrap event on August 24, 2019; if you are unable to attend that event please email [laura.timms@cvc.ca](mailto:laura.timms@cvc.ca) to make other arrangements

<sup>1</sup> Wind values based on the Beaufort wind scale:

0: Calm; smoke rises vertically

1: Light Air; Smoke drift indicates wind direction, still wind vanes

2: Light Breeze; Wind felt on face, leaves rustle, vanes begin to move

3: Gentle Breeze; Leaves and small twigs constantly moving, light flags extended

4: Moderate Breeze; Dust, leaves, and loose paper lifted, small tree branches move

Timed surveys should not be carried out in wind levels higher than a moderate breeze, and ideally in wind of gentle breeze or less

<sup>2</sup> Timed surveys should not be carried out in precipitation heavier than a light drizzle, and ideally in clear conditions

<sup>3</sup> There is no requirement to submit pictures from the timed surveys to iNaturalist; however, if you do please note it on this form as well as in the eButterfly comments box under the species for which pictures were submitted

<sup>4</sup> If you wish to submit a route map, including details of the route walked and the species observed, you may use the other side of this form or a separate piece of paper
